

# Understanding the Social Emotional Impact of Perinatal Trauma and Loss

Webinar Series  
Day 3  
Hybrid and In-Person

## Educational Goals

- Describe how to provide care to grieving families whose infants have experienced SIDS or sleep related death.
- Explain the characteristics of PURPLE crying and practical techniques to soothe a crying baby.
- Describe how to help families manage their own feelings of frustration during extended crying periods.
- Describe lactogenesis after loss and provide supportive options for grieving families.

## Learning Objectives

- Understand the importance safe sleep for infants: Participants will understand the value of educating families about safe sleep and using the recommended communication for grieving families.
- Understand the Importance of preventing infant shaking: Participants will understand the value of incorporating the PURPLE crying education for pregnant and postpartum families they serve.
- Understand the importance of lactogenesis for grieving families: Participants will recognize how lactation support after a loss impacts the families grieving experience.

Light lunch will be served
